## Capabilities

## Technical Support, Maintenance & Repairs

Radio communications systems provide a vital link to organisations and enterprises in the areas of Service Delivery and Staff Health, Safety and security. Regardless of whether you are an Emergency Services Operation, a Mining Facility, Warehouse, Security, Construction or a Transportation & Logistics company, the need for instant and reliable communications is vital.

Whilst operational needs can vary from a large multi-site network covering a vast landscape and hundreds, possibly thousands of terminals to a small enterprise with a handful of terminals in a warehouse facility, this does not diminish your need for communications you can trust. And when things go wrong, access to high quality and timely technical support is a key to getting operations back on track.

Regular maintenance & servicing is a proven method to avoid critical loss to your communications. Sometimes viewed as an unnecessary operating expense where the phrase "if it isn't broke don't fix it" has been used; at AA Radio we have found another phrase used often which rings true; "prevention is better than cure". This point has never been argued by any organization that has suffered the loss of a communications due to lack of maintenance and regular servicing.

AA Radio specialises in providing all types of maintenance & service to a huge variety of users and a vast variety of communications systems.

As a specialist service and support provider for over forty (40) years we have grown to the largest independent supplier of radio communications support services in Victoria with have facilities at our head office workshop & warehouse in Vermont, along with points of presence in Bendigo, Shepparton and the Sunraysia region.

In addition to workshop support, AA Radio's team of field engineers and service technicians are able to attend to on-site requirements ranging from base site maintenance, console system support, portable & mobile terminal repairs, vehicle systems and installations into vehicles, buildings and specialized craft.

Repairs, maintenance and installations can be conducted at all metropolitan and regional locations at customer sites.

In addition to these extensive capabilities AA Radio can complement these services by offering 24/7 365-day support should your requirements demand it.

AA Radio maintains many critical systems and networks on this basis where quality of service is a must.

With the capabilities of AA Radio, a desire to provide excellence in service, a genuine care and sense of pride in providing this service, you can understand why AA Radio Services is the right choice for all of your support and maintenance needs.
